

**BARCLAYS**  
**THE DIRTY BANK**

## **What is happening outside Barclays?**

This is a prayerful protest by ordinary people who are concerned about the wellbeing of our planet.

## **Why, what's wrong?**

2024 was the hottest year on record. The effects of the climate and ecological crisis, from water shortages to rising food prices, are being felt on every continent.

## **Why are we at Barclays Bank?**

Barclays is the biggest funder of fossil fuels in Europe. Their business is wrecking our planet and hitting nature and poorer nations the hardest.

## **What can we do?**

If you share our concern for the amazing world we live in and depend on, please consider changing your bank to one that really cares for your future and the wellbeing of the planet. It is easy to switch to a greener bank and the following websites can help you do this:
